- ECRF
- performs statistical analyses in order to improve the popularity and awareness concerning the sport and to establish the development of its activities in the field of recreational sports,
 - it may use photos and videos of the participants of the ICF SUP World Championships to promote the sport or the event. Use in this case means that it can display photos and videos taken at the event on its website and in printed publications related to the event.

Legal basis of data processing

The legal basis for the processing is a voluntary, specific, informed and unambiguous declaration of your will which you consent to the processing of your personal data as detailed below. You can give your consent by checking the checkbox in the online application system.

In the case of photographs and video recordings of the participants of the ICF SUP World Championships, the legal basis of processing is the legitimate interest of the data controller.

Duration of data processing

ECRF will process the personal data provided by you until the withdrawal of your consent, but at longest until the end of the purpose of the data processing.

In the case of photographs and video recordings of the participants of the ICF SUP World Championships, the duration of data processing lasts until the date of the next event.

Data transfer abroad

ECRF does not transfer any data abroad or to third parties.

Scope of data processed

ECRF does not register any special categories of data about the participants, it only registers the data provided by the participants. In the online registration system, credit card payments are made on the interface of Stripe, <https://stripe.com/en-hu>, where participants provide the data directly to the financial service provider, therefore no data related to the bank card is in the possession of ECRF.

Data generated when visiting websites

Like all web servers on the Internet, we store certain data when you view our websites, and this may be considered personal data. When you visit our websites, our servers store commonly used data to troubleshoot, improve services, and detect intrusion attempts:
